

Living in Los Angeles, I benefit greatly from XM Radio's local traffic and weather channel. They provide a much more comprehensive and current report than traditional broadcast radio. I can access the report whenever I want instead of waiting for the next AM report.

Moreover, I PAY FOR THIS SERVICE. My monthly service charge should guarantee this service to continue. Having learned that this may not be the case, I'm signing this petition to urge the FCC to stop NAB's ridiculous petition 4-160. It is my right to be provided with services that I pay for and it is XM Radio's First Amendment right to provide me with this service. Please do not let the agenda of the National Association of Broadcasters limit the services of competitors now or anytime in the future.
